enjoy the convenience of unlocking and locking the door with a backlit touch keyboard: You'll never have to carry your keys with you again. Create unique pin codes for friends and family and delete codes when you need to. The Grade 2 castle is certified and maintained by Yale, one of the world's most famous brands of locking industry, which has been providing homes since 1846, ensuring that your home and family are always safe. Upgrade with the Yale-Wave or zigBee module if you ever decide to integrate the castle into your smart home. The modules sold on Yale2you.com Amazon.com YRD220 Real Living electronic touch lock deadbolt adds a level of simplicity to a home without a key entry without compromising any security. Its interactive touch screen and voice programming make it the perfect deadbolt for any homeowner looking to add extra security without additional problems. The latest in Lock Technology With an interactive touch screen that can be programmed straight to the castle, The Real Living deadbolt of Yale is very easy to use and put in and even boasts voice aid. It can be mounted with a screwdriver and placed in the usual deadbolt lock space. The lock privacy feature allows you to block all users, while the auto-locking feature forces the deadbolt to block once 30 seconds has passed, and the fake alarm is triggered when the wrong code is put several times. The touch screen is also illuminated, so there is no voltage to use at night. The lock has 12 buttons in the phone's standard layout template, and it's a snap to customize the PIN for new users, adding an extra layer of convenience for home security. The touchscreen is weather-resistant and the voice guide can be used in English, Spanish or French. The plethora of useful FeaturesYale's Real Living deadbolt lock has a sturdy all-metal exterior escutcheon and a motorized in-and-out tape bolt that retains lock functionality even if the door isn't perfectly aligned. Because of its comfortable size, it can go above the usual lever lock and it does not need additional holes to be inserted during installation. It has a variable volume, so it can be set on individual preferences and low battery warning, so there is no worrying about safety compromised due to lack of energy. It can be used with doors that are 1-3/8 inches to 6-1/4 inches thick (1-3/8 inches with a special thin door pad) and is available in three finishes to fit various decorations: polished brass, butter-shabby bronze, and satin nickel. Dimensions - The YRD220 Real Living electronic touchscreen deadbolt lock measures 1-11/32 inches deep in the exterior, 2-23/32 inches in outer width, and 6-5/64 inches in outer height and weighs 5 pounds. It comes with an annual electronic warranty and limited service life finish and mechanics warranty O YaleYale is one of the oldest international brands in the world one of the most famous names in the lockout industry.
